

Acceptance Test and Acceptance-Test Driven Development

with Robot Framework

Login Demo

<https://github.com/rtomac/robotframework-selenium2library>

Run server with python in folder demo app

\$python server.py start

Demo application starting on port 7272

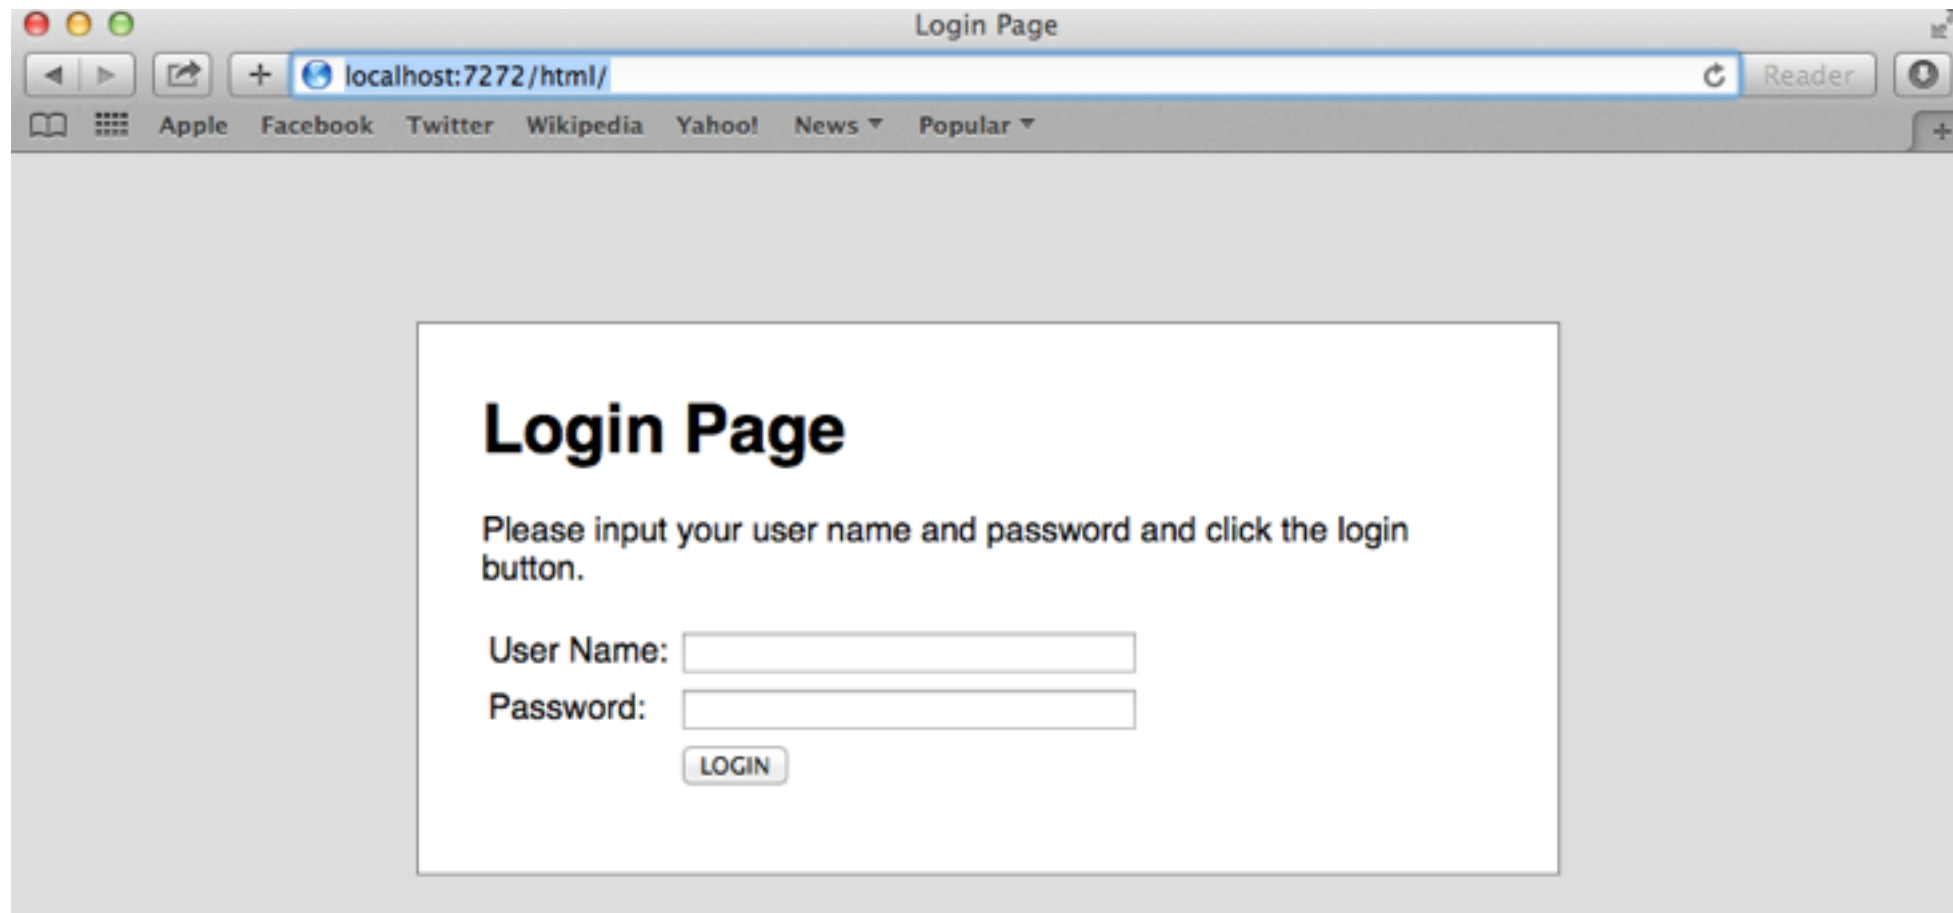

Demo

Go to <http://localhost:7272/html>

username = demo

password = mode

The screenshot shows a web browser window titled "Login Page". The address bar displays "localhost:7272/html/". Below the address bar, there are several navigation links: Apple, Facebook, Twitter, Wikipedia, Yahoo!, News, and Popular. The main content area of the browser displays a login form. The form has a title "Login Page" and a message: "Please input your user name and password and click the login button." Below this message, there are two input fields: "User Name:" and "Password:". Below the "Password:" field, there is a button labeled "LOGIN".

Login Page

Please input your user name and password and click the login button.

User Name:

Password:

Workshop

- Create test case with Robot Framework
 - **Valid test case**

Example of Valid login

```
1  *** Settings ***
2  Library           Selenium2Library
3
4  *** Testcases ***
5  Valid Login
6      Open Browser    http://localhost:7272/html
7
8      Input Text      username_field    demo
9      Input Text      password_field    mode
10     Click Button    login_button
11
12     Location Should Be    http://localhost:7272/html/welcome.html
13     Title Should Be      Welcome Page
14     Page Should Contain   Login succeeded
15
16     Close Browser
```

Duplication

```
1 *** Settings ***
2 Library          Selenium2Library
3
4 *** Testcases ***
5 Valid Login
6     Open Browser  http://localhost:7272/html
7
8     Input Text    username_field    demo
9     Input Text    password_field    mode
10    Click Button  login_button
11
12    Location Should Be  http://localhost:7272/html/welcome.html
13    Title Should Be    welcome Page
14    Page Should Contain Login succeeded
15
16    Close Browser
```

Remove Duplication to Constants

```
1  *** Settings ***
2  Library           Selenium2Library
3
4  *** Variables ***
5  ${LOGIN_URL}      http://localhost:7272/html
6  ${WELCOME_URL}    ${LOGIN_URL}/welcome.html
7
8
9  *** Testcases ***
10 Valid Login
11     Open Browser    ${LOGIN_URL}
12
13     Input Text      username_field    demo
14     Input Text      password_field    mode
15     Click Button    login_button
16
17     Location Should Be    ${WELCOME_URL}
18     Title Should Be      Welcome Page
19     Page Should Contain   Login succeeded
20
21     Close Browser
```

More Technical Detail

```
1  *** Settings ***
2  Library           Selenium2Library
3
4  *** Variables ***
5  ${LOGIN_URL}      http://localhost:7272/html
6  ${WELCOME_URL}    ${LOGIN_URL}/welcome.html
7
8
9  *** Testcases ***
10 Valid Login
11   Open Browser      ${LOGIN_URL}
12
13   Input Text        username_field    demo
14   Input Text        password_field    mode
15   Click Button      login_button
16
17   Location Should Be  ${WELCOME_URL}
18   Title Should Be    Welcome Page
19   Page Should Contain Login succeeded
20
21   Close Browser
```

Try to use high level language

```
1  *** Settings ***
2  Library           Selenium2Library
3
4  *** Variables ***
5  ${LOGIN_URL}      http://localhost:7272/html
6  ${WELCOME_URL}    ${LOGIN_URL}/welcome.html
7
8
9  *** Testcases ***
10 Valid Login
11     Open the login page
12     Fill in username    demo
13     Fill in password    mode
14     Submit data to system
15     Welcome page should be open
16     Close Browser
17
```

Keywords

Create keywords

```
18 *** Keywords ***
19 Open the login page
20     Open Browser    ${LOGIN_URL}
21
22 Fill in username
23     [Arguments]    ${username}
24     Input Text      username_field    ${username}
25
26 Fill in password
27     [Arguments]    ${password}
28     Input Text      password_field    ${password}
29
30 Submit data to system
31     Click Button    login_button
32
33 Welcome page should be open
34     Location Should Be    ${WELCOME_URL}
35     Title Should Be       Welcome Page
36     Page Should Contain   Login succeeded
```

Split to Resource file

```
1  *** Settings ***
2  Library      Selenium2Library
3
4  *** Variables ***
5  ${LOGIN_URL}    http://localhost:7272/html
6  ${WELCOME_URL}  ${LOGIN_URL}/welcome.html
7
8  *** Keywords ***
9  Open the login page
10     Open Browser    ${LOGIN_URL}
11
12  Fill in username
13     [Arguments]    ${username}
14     Input Text      username_field    ${username}
15
16  Fill in password
17     [Arguments]    ${password}
18     Input Text      password_field    ${password}
19
20  Submit data to system
21     Click Button    login_button
22
23  Welcome page should be open
24     Location Should Be    ${WELCOME_URL}
25     Title Should Be      Welcome Page
26     Page Should Contain  Login succeeded
27
```

Test case look better !!!

```
1  *** Settings ***
2  Resource      09_resource.txt
3
4  *** Testcases ***
5  Valid Login
6      Open the login page
7      Fill in username    demo
8      Fill in password    mode
9      Submit data to system
10     Welcome page should be open
11     Close Browser |
```

Workshop

- Create test case with Robot Framework
 - Invalid test case

Good Test Case

```
1  *** Settings ***
2  Suite Setup      Open the login page
3  Test Setup       Go to login page
4  Test Template    Login With Invalid Credentials Should Fail
5  Suite Teardown   Close Browser
6  Resource         09_resource.txt
7
8  *** Test Cases ***
9  Invalid Username      User Name      Password
10 Invalid Password      demo   invalid
11 Invalid Username And Password  invalid      whatever
12 Empty Username        ${EMPTY}    xxx
13 Empty Password        demo   ${EMPTY}
14 Empty Username And Password  ${EMPTY}    ${EMPTY}
15
16
17 *** Keywords ***
18 Login With Invalid Credentials Should Fail
19     [Arguments]  ${username}  ${password}
20     Fill in username  ${username}
21     Fill in password  ${password}
22     Submit data to system
23     Login Should Have Failed
```

Question ?
